Education

Bachelor of Engineering (Computer Engineering) <i>Savitribai Phule Pune University (SPPU)</i>	2026 – Present <i>CGPA: 9.03</i>
Higher Secondary Certificate (HSC) <i>Maharashtra State Board</i>	2023 <i>72.83%</i>
Secondary School Certificate (SSC) <i>Maharashtra State Board</i>	2021 <i>95.00%</i>

Technical Skills

Languages:Python, Java,HTML/CSS,SQL
Developer Tools: VS Code,Jupyter Notebook,Maven,git,Github
Technologies/Frameworks: streamlit,fastAPI
Libraries: NumPy, Pandas, Matplotlib, Scikit-learn, seaborn,Streamlit
Databases: MySQL, Firebase Firestore

Projects

- OfferBuzz – Nearby Shop Offers and Gift Card Management System** | *java,javafx,maven,firebase firestore***July 2025**
- Designed and developed the complete application using JavaFX following the MVC architecture.
 - Integrated Firebase Firestore for real-time cloud database operations.
 - Implemented secure authentication for Buyer, Seller, and Admin modules.
 - Developed complete CRUD operations for managing offers.
 - Integrated notifications and feedback system with rating functionality.
 - Developed offer redemption using a unique Magic Code verification system.
- Task Manager Application** | *Python, FastAPI, MySQL, SQLite, SQLAlchemy, Streamlit* **february 2026**
- Developed a full-stack Task Manager application using FastAPI for the backend and Streamlit for the frontend.
 - Designed and implemented RESTful APIs for creating, retrieving, updating, and deleting tasks (CRUD operations).
 - Utilized SQLite during the development and testing phase for rapid prototyping before migrating to MySQL.
 - Built an interactive user interface with Streamlit for task creation, tracking, and management.
 - Integrated MySQL as the primary database for persistent task storage and efficient data management.
- Autonomous Disaster Response Rover** | *ESP32, Arduino, Flutter, Salesforce Cloud, IoT, REST APIs* **Feb 2026**
- Designed and developed an IoT-enabled disaster response rover for real-time monitoring during tunnel collapse and mining rescue scenarios.
 - Integrated multiple sensors for human detection and environmental monitoring in hazardous conditions.
 - Programmed the ESP32 microcontroller for real-time sensor data acquisition and wireless communication.
 - Implemented Salesforce Cloud integration to securely store and manage real-time sensor data.
 - Developed a Flutter mobile application to visualize live sensor readings and rover status.
 - Integrated REST APIs for seamless communication between the rover, cloud platform, and mobile application.

Internship

- Incubators Systems Pvt. Ltd., Pune** **January 2026 – February 2026 (1 Month)**
IoT and Robotics Intern
- * Developed an IoT-enabled autonomous disaster response rover integrating ESP32, multiple sensors, Salesforce Cloud, and a Flutter mobile application for real-time human detection and environmental monitoring in mining and tunnel collapse scenarios.
 - * Developed IoT-based applications by integrating hardware components such as sensors and actuators with ESP32, Arduino, and Raspberry Pi.
 - * Implemented communication and networking protocols for real-time device connectivity.
 - * Integrated cloud services for IoT data collection, storage, and monitoring.
 - * Developed cross-platform mobile applications using Flutter for IoT device interaction

- Rubicon Skill Development Pvt. Ltd.** **Dec 2025**
Training Program (30 Hours)
- * Completed a data visualization training program focused on data analysis, visualization, and dashboard development.
 - * Gained hands-on experience in data transformation, and creating interactive visualization using matplotlib,seaborn.
